

Dry Needling Clinical Pearls & Review (for CMTPT's)

Formerly known as Mastery & Update of DN

About the Course

You have already demonstrated that you master the art of dry needling and that you know the scientific basis and literature! Your patients appreciate how you incorporate dry needling into your comprehensive treatment approach! Your referral sources know the quality of your work and your great clinical outcomes! But...

- Are there muscles you have not needed since you attended the Myopain Seminar DN courses?
- Are there muscles you would like to review to feel more confident?
- Do you want to learn new and updated techniques?
- Do you have difficult patients and you just don't know where to start or how to continue treatment?

The Dry Needling Clinical Pearls & Review course addresses questions skilled dry needling clinicians may have after completing the CMTPT Course Program and using the skills in their practice for a while. This course will focus on mastering and perfecting your skills, learning advanced and updated techniques and the newest research.

Courses with amazing instructors and great clinical lab sessions! Highly recommended!
